

LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION
MANDATORY LANGUAGE - TIER III

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

DOG RIDGE WSC PWS 0140044 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During (52) 3YR2025, we did not monitor or test for LCR and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were [or will be] taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
<i>LCR Sample Tap Samples 3YR2025</i>	<i>20 / triennially</i>	<i>0</i>	<i>June 1, 2025 - Sept 30, 2025</i>	<i>Date: January 30, 2026</i>

What is being done?

[corrective actions]: In order to return to compliance, we must collect a complete set of **forty (40) Sample Tap Samples** between January 1, 2026 and June 30, 2026, and report the analyze results to TCEQ by July 10, 2026 and those samples will be collected on (date) January 30, 2026.

We are working to correct the problem. For more information, please contact:

Water System Official: Rudy Watkins General Manager

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for DOG RIDGE WSC

PWS 0140044

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During MAY 2025, we did not monitor or test for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done? In order to return to compliance our system had to collect monthly distribution samples, take it to a lab to be analyzed and send the results to TCEQ and we collected current distribution samples and returned to compliance as of 07/31/2025.

For more information, please contact:

Water System Official: Rudy Watkins General Manager Phone Number: 254-939-6533

Date Distributed: January 15, 2026
